Lucy’s Warbler Triangle Nest Box Plan

Materials:
- (1) 5½” × ½” × 2.5’ or longer of untreated cedar board or fence picket
- 4D nails or ½” screws

Instructions:
1. Start with sides (1) and cut the 45° triangles first.
2. Make the second cut at the 2 marker.
3. Set the saw blade at 45° and make the cut at the 3 marker.
4. Return the blade to 90° and make the rip cut to shorten the sides of the back and bottom to 3½” (4).
5. Cut at the 5 marker.
6. To assemble, attach sides to bottom first, then to the back. Add the top last.

Notes:
- Use screws if possible and pre-drill holes to prevent splitting. If using nails or brads, also glue edges.
- Leave enough room (~1”) at the top and bottom of the back board for easy mounting.
- If making several boxes, consider using cedar fence pickets in both 5.5” and 3.5” widths.
